

# “I DON’T LICK IT, BUT I LIKE IT.”

Animals Talk. **MAI**  **ANIMAL HEALTH** Listens.

## StopLick™

Lick Deterrent Aid

StopLick is a lick deterrent aid that covers bandages on animal’s extremities and replaces the need for Elizabethan collars and bitter sprays. It delivers a mild tingle to the tongue, providing an effective treatment to prevent licking and promote the healing of wounds, post-surgical sites and lick granulomas. The non-invasive, battery powered design also allows the animal to behave normally while the bandage remains in place, maximizing successful recovery.

Also try  **LickShield™** for larger areas!
