"I DON’T LICK IT, BUT I LIKE IT."

Animals Talk. MAI ANIMAL HEALTH Listens.

StopLik is a lick deterrent aid that covers bandages on animal’s extremities and replaces the need for Elizabethan collars and bitter sprays. It delivers a mild tingle to the tongue, providing an effective treatment to prevent licking and promote the healing of wounds, post-surgical sites and lick granulomas. The non-invasive, battery powered design also allows the animal to behave normally while the bandage remains in place, maximizing successful recovery.

Also try LikShield for larger areas!
"IT’S THE FIRST BREATH THAT MATTERS MOST."
