

Equine Periodontal System

Item #53060

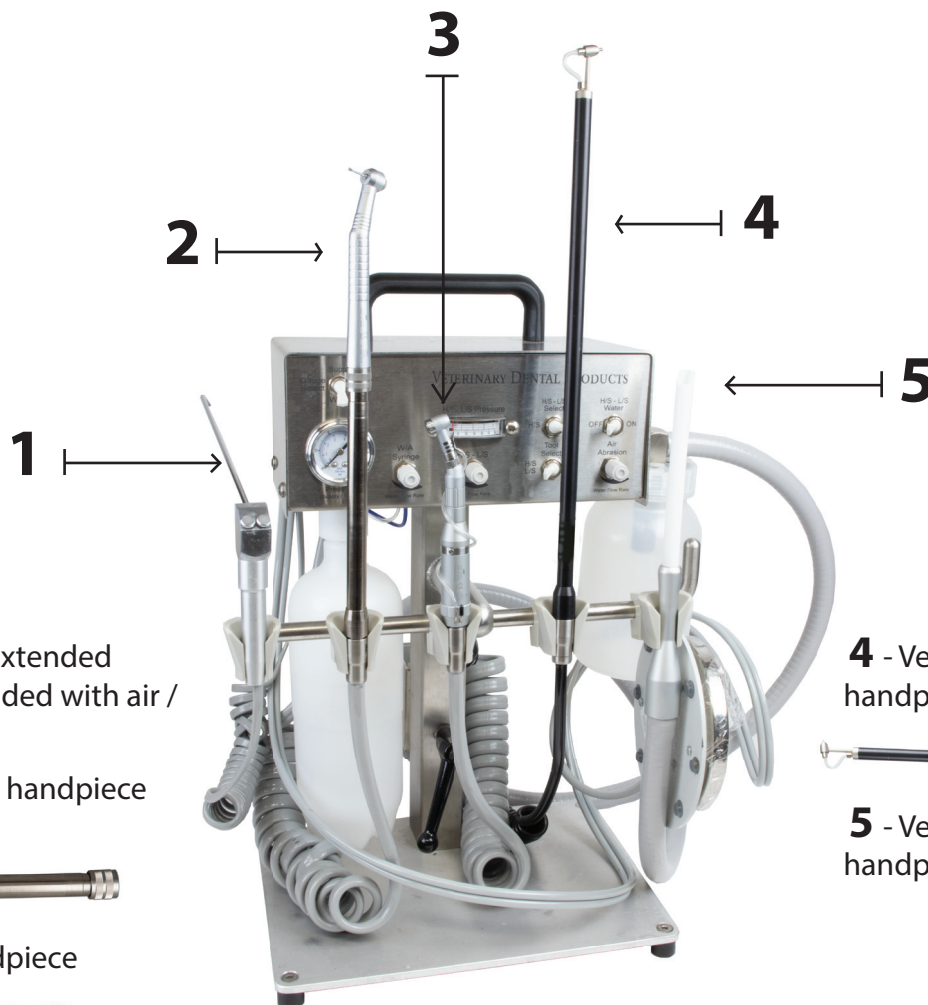

Item #53062

The Equine Periodontal System features a mobile unit, or table top unit, including all the essential handpieces to perform periodontal and endodontic procedures for equine.

- Complete system (#53060) features a durable mobile cart, which has large pneumatic tires to roll easily across uneven surfaces.
- System runs quietly using a nitrogen source, allowing complete mobility.
- Adjustable height console on the mobile cart allows the unit to be lowered for proper storage, or raised for easy accessibility during procedures.
- Equine Periodontal System can be ordered separately for use as a counter top unit (#53062) using a direct air source.
- Equine Periodontal System includes all handpieces, instruction manual and first-time use supplies.
