Visual Communications

Clip-Its™ **PATENTED**

Clip-Its™ are a visual aid used to provide specialized care instructions to staff and clinicians regarding a patient's requirements. The color coded Clip-Its™ provide direction regarding patient needs and expectations of staff, as well as awareness of patient personalities.

Clip-Its™ provide a visual reminder to ensure patient care instructions are not overlooked. The Clip-Its™ provide clear direction and instruction to everyone involved in patient care.

Clip-Its™ Details:

- Increase communication and consistency of staff directives or instructions
- Color coded system is easy to follow
- 3" x 3" engraved signs with alligator clip for attachment to cage
- Simple and reliable visual communication
- Engraved, permanent instructions provide consistent patient care
- System may be used within a clinic, kennel or grooming facility
- Customization available to accommodate clinic needs
- Durable, commercial indoor / outdoor material for extended usage
- Easily attaches to kennels, runs and cages
- Carabiners may also be used to hang Clip-Its™
- May be clipped together vertically for multiple directions / instructions
- Clip to scrubs for easy access

**Color coded system clips
directly to kennels,
runs and cages!**

Write-Boards™

Write-Boards™ provide an effective method of communication between staff related to patient requirements. Using Write-Boards™ allows you to create individualized messages for others to follow. Write-Boards™ clip to a kennel, run or cage and provide high visibility. Write-Boards™ are reusable and may be used in various ways to remind staff of details including supplies needed, clinic needs, equipment maintenance and ultimately for the promotion of high quality patient care.

Write-Boards™ Details:

- Simple, cost effective method of communication
- Multitude of office and clinic uses in addition to patient care
- Reusable and visible
- Sizes available: 3" x 3", 3" x 6", 6" x 6" and 12" x 4"
- Inventory control management aid
- Permanent marker wipes off with alcohol
- Dry erase marker wipes off easily with dry cloth
- May be clipped together vertically for multiple directions / instructions

Business Signs

Business Signs from Visual Management provide clients with critical details and clinic policies. Most veterinary clinics share common policies and critical details in their daily operations. For this reason, the statements inscribed on our Business Signs are messages that are universally used and required in the business world. Sign customization is also available, as well as braille signage.

- Effective method of communication
- Color coded according to general content and urgency
- Textured colors are commercial grade and scratch / fingerprint resistant
- Text engraved in Helvetica font unless otherwise requested
- Optional adhesive backing
- Size: 8" x 6" unless otherwise noted

Why Vaccinate?

... pet diseases can be prevented by vaccination. Even if always kept indoors, pets are exposed to viruses in the air, dust or on things. Vaccination is inexpensive protection but costly treatment or premature death.

Immunity produced by vaccinations wanes over time.

Carefully assess a pet's risk factors then recommend appropriate vaccinations, boosters, screening and preventives.

rabies, a fatal infection of the nervous system, attacks all warm-blooded animals living humans. There is no cure. Vaccination is only protection.

Leine Parvovirus, also known as **emper**, is highly contagious, easily omitted from cats to cats and may be fatal.

Leine Bordetella Bronchoseptica (FeBb) highly contagious bacteria that causes upper respiratory infection which may lead to pneumonia and may cause death.

Leine Respiratory Diseases are highly contagious from cat to cat and widespread. Pruritus is a cat's best protection.

Leine Leukemia (FeLV) is a form of cancer, is highly contagious virus that is one of the big killers of cats. A blood test may be necessary before vaccination.

Leine Infectious Peritonitis (FIP) is an able viral disease that is spread by fecal to fecal. Ask us for details.

Leine Distemper & Adenovirus are spread, contagious and deadly to dogs.

Leine Leptospirosis bacteria affects eyes and may cause vomiting, convulsions and paralysis in severe cases.

Leine Bordetella Bronchoseptica and Influenza are contagious upper respiratory infections in dogs which cause a violent, dry, hacking cough that may last for weeks.

Leine Parvovirus and Coronavirus are highly contagious, life-threatening viral fatal infections in dogs.

Leine Intestinal Parasite Exam for detection of *Coccidia*, *Giardia*, *Hookworm*, *Roundworm*, *Tapeworm* or *Whipworm* infection.

Leine Parasite Testing to detect infection by: *Borrelia* (*Lyme Disease*) *Trichinella*

HOW CAN I PROTECT MY PETS HEALTH?

Wellness Screening

Blood screening, urinalysis, ECG, ultrasound, chest X-rays and other tests may be part of a comprehensive physical exam or wellness screening in different stages of a pet's life.

Puppy-Kitten: Testing establishes baselines for recognizing the onset of mid-life health problems. Early dental care is important in preventing periodontal disease.

Mid-Life: Periodic comparison of blood, urine and ECG values against a pet's established baselines helps detect problems in early stages when treatment is usually more effective. Proper diet and nutrition can give a pet a longer, happier life.

Senior: Early treatment of diseases of aging such as kidney, liver, heart, thyroid, diabetes and arthritis is less expensive than treating advanced stage diseases.

Geriatric Pet: Early detection and treatment of internal organ failure allows us to help make an aging pet more comfortable.

Because pets age much faster than humans, they need frequent check-ups.

pet age	25-50	50-60	60-70	70-80
1	7.12	12.24	14.14	16.20
2	10	16	19	26
3	13	21	29	32
4	16	27	35	38
5	19	33	39	42
6	22	40	45	46
7	24	45	48	52
8	26	50	52	57
9	28	53	56	62
10	30	56	59	66
11	32	60	63	72
12	34	63	67	78
13	36	67	71	83
14	38	70	75	89
15	40	73	78	95
16	42	76	82	104
17	44	80	87	111
18	46	83	90	120
19	48	86	93	129
20	50	89	96	139

Preventative Care for Healthier Pets

Allergies and dry skin cause itching, scratching, unsightly coat and skin problems for a pet. Diet, environmental allergens or parasites may be at fault. We can help ease a pet's discomfort. **Fleas** cause flea allergy dermatitis. We have highly successful new flea control products. **Ear Mites** cause acute otitis. Ear odor or scratching indicates treatment is needed.

Arthritis causes chronic pain for pets. Sulfonamides and/or bute and/or ibuprofen are early signs of arthritis. We have effective pain management medications to help keep a pet more comfortable.

Dental Care: Periodontal disease leads to liver, kidney and heart disease. Bad breath and drooling are signs of periodontal disease. Regular dental examinations, professional dental scaling and regular dental home care may add 3 years to a pet's life.

Annoying behavior such as barking, cats clawing furniture and other problems can be controlled gently and effectively.

Internal Parasites threaten a pet's health, if mosquitoes live where a pet lives or travels, they need to be protected from **Heartworms**. If your pet lives where a pet lives or travels, there are tests for **Borrelia** (*Lyme Disease*) and other tick-borne diseases.

Intestinal Parasites may cause severe pet health problems and certain parasites can infect humans. **Giardia** infection causes diarrhea and weight loss, despite normal appetite. Humans often acquire abdominal cramping. **Tapeworm** eggs are often not present in a stool sample. If worms are observed, please tell us and bring a fresh worm sample if possible.

Spaying or Neutering is recommended for all pets not intended for breeding to reduce risk of tumors, cancer, annoying mating behavior, abandonment and subfertility. There are not enough homes for all the dogs and cats born every year. The procedure can be done at almost any age and is usually recommended before the first female heat cycle. Ask us about the advantages of **blood and ECG screening** before any surgical procedure. **Pain management** is a pet's best friend and makes recovery from surgery less painful.

EduPet™ Client Handouts*

Professional, non-commercial 3" x 7" EduPet™ handouts promote your services and the importance of preventative care. Mix/Match per 100.

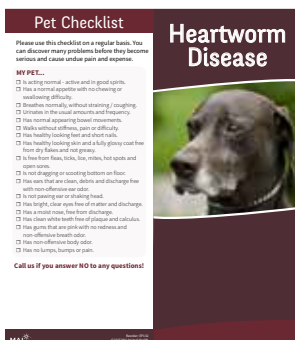

Pet Dental Care

People can choose their own level of oral hygiene. Pet health depends on their choices.

Best: Your pet gets professional dental care. The handling of its mouth, x-ray places around your center finger and bones from long-term oral health surfaces and gumlines. You may also add a small amount of oral hygiene, available from your veterinarian. There are further topics, and it's a case approach request.

When your pet is comfortable with the process, by brushing with a toothbrush, your veterinarian will fit your pet's mouth with one hand and the top lip to be the crown side, teeth with the other. This is where salivary glands are located and where problems occur.

Your Pet's Health is Up to You!

Pet Checklist

Heartworm Disease

Please use this checklist on a regular basis. You can detect early problems before they become serious and cause undue pain and expense.

MY PET...

- Is acting normal, active and in good health.
- Has a normal appetite with no vomiting or regurgitating difficulty.
- Breathes normally without wheezing, coughing or gasping in the heat and/or humidity.
- Has normal appearing bowel movements.
- Walks without stiffness, pain or difficulty.
- Has healthy looking feet and short nails.
- Has healthy looking ears and a healthy glow that has been from dry flakes and red greyness.
- Is free from flea, ticks, flea bites, hot spots and open sores.
- Is not dragging or scooting bottom on floor with no discharge or odor.
- Has ears that are clean, white and discharge free with no inflammation.
- Is not panting, gas or wheezing hard.
- Has bright clear eyes, free of water and discharge.
- Has a moist nose, free from discharge.
- Has clean white teeth free of plaque and calculus.
- Has clean, clear urine free from redness and non-offensive smells.
- Has no inflammation, heat, pain.
- Has no lumps, bumps or pain.

Call us if you answer NO to any questions!

Pet Tributes & Memorials

At Heaven's Gate - 23" x 13"

Framed with Gold/Black frame.

Tribute reads:

"I would have carried you to heaven if I could have. I would have wrapped you in my arms, then step by step I would have told you stories of all our yesterdays, of memories created, a journey shared, of lives, our lives filled with laughter and love, a passion, an energy, yet a softness that soothed our souls.

Visions would have danced in our heads remembering the very moment that made your heart mine and mine yours. You, a companion, a partner, a teacher, a friend... I would have thanked you for all you gave, your heart was big and your soul radiant. I would have thanked you for sharing your life with me. We would have reflected on our journey, our family, our friends. As the time grew closer I would have held you tightly as if to never let you go. I would have kissed you "Good Night" and then very carefully handed you over at Heaven's gate. I would have told you, "It's okay to go, for we will meet again." I would have if I could have, but I didn't have to, you made it on your own, as I can hear you telling stories from Heaven above. The memories and the joy of having you live on in my heart. Thank you for the journey of a lifetime.

Forever In Our Hearts"
